VISITOR ACTIVITIES

Stunning vistas and unique topography provide an impressive backdrop for recreation. American Prairie has a truly rugged quality and a sense of uninterrupted nature. Discover the power of dark skies, and remote, unbroken land. Each visit offers something new whether you are on foot, wheels, or horseback.

Explore the vastness of the landscape, smell the sage, and listen to birds call. Enjoy hiking, biking, and horseback riding on two-track roads.

DRIVING TOURS In addition to the county roads and two-tracks that cross American Prairie lands, roads 201, 321, and 844 in the Charles M. Russell National Wildlife Refuge (CMR) are suggested for driving tours. Many roads in the region are not signed; a GPS or GPS phone app with preloaded maps is highly recommended. See the back of this map for a QR code to a free digital GPS version of this map.

WILDLIFE AND BISON VIEWING

Observe prairie dog behavior or keep an eye out for the many species of migrating birds traveling through American Prairie land. Spot elk, bison, and pronghorn, and look for hawks and eagles overhead.

From spectacular sunsets and the dazzling night sky to unique wildlife behavior and beautiful blooming flowers, the prairie offers vast opportunities for amateur or professional photographers.

Tens of thousands of acres owned by American Prairie are available for hunting via Montana Fish, Wildlife and Park's Block Management program. Access is also available to adjacent and landlocked public land. Check americanprairie.org/hunting for the most up-to-date hunting information.

Several public facilities are available including tent camping, huts with kitchens and bunks, RV spaces with full hookups, sleeping cabins, and shower facilities. See the reverse side of the map for locations. Make reservations online at americanprairie.org/visit. Dispersed tent camping is also permitted on American Prairie land. See **americanprairie** org/camping-on-public-lands for guidelines.

Bikers will find a great variety of riding on the American Prairie property. There are innumerable two-tracks to explore on day trips, as well as potential to create multi-day bikepacking routes through American Prairie, state, and federal lands. E-bikes are allowed on motorized travel routes. Bring a

full repair kit and bike pump.

0 Visit the National Discovery Center at 302 W Mair Street in Lewistown on your way to the prairie. The Center features interactive exhibits about the prairie ecosystem, community meeting spaces, and a film theater. Check americanprairie.org/national-discovery-center for hours and more information.

VEHICLE

SAFETY AND WELL-BEING

American Prairie is situated in a remote location where services (including cell phone coverage) are extremely limited. Be prepared to self-rescue and remember that American Prairie is not responsible for any damage or harm done to your vehicle, belongings, or person while you are on American Prairie property.

Visitors should prepare for a range of weather conditions. We recommend layering clothing and wearing sturdy shoes. We also recommend bringing a wind and rainproof jacket, a sun hat, water (see below), food, binoculars, a camera, a first aid kit, a flashlight or headlamp, sunscreen, and bug spray. Many roads in the region are not signed; a GPS or GPS phone app with preloaded maps is highly recommended. See the back of this map for a QR code to a free digital GPS version of this map.

Bring enough drinking water for the duration of your stay plus extra just in case. There is no potable water available on American Prairie property at this time, unless where specified in association with camping.

Visit in a reliable four-wheel-drive vehicle with at least 8 inches of clearance and a full tank of gas. (See the opposite side of the map for recommendations on where to fill up before getting to American Prairie property). Roads are primarily dirt and gravel, and often are unmaintained. Check the forecast and avoid driving in wet conditions. Heavy rains mix with bentonite clay found in the soil to produce a very slippery and sticky driving surface, also known as "gumbo." Many roads become impassable when wet. Check your spare prior to your visit, pack a patch kit and pressure gauge, and do not drive off designated roads. Visit americanprairie.org/road-andweather-conditions for more information.

Dry conditions, strong winds, and low humidity create potential for grass fires, regardless of season. Wildfires can start from a campfire outside a designated fire ring, a cigarette that has not been properly extinguished, a vehicle undercarriage, or lightning strikes. Check americanprairie. org/road-and-weather-conditions for the most up-to-date fire conditions on American Prairie land.

WILDLIFE & LIVESTOCK

Do not approach any animals, including bison, and always view from a safe distance (100 yards). When hiking, be aware of your surroundings and pa special attention to the ground to avoid contact with rattlesnakes (the only venomous snake in the region). American Prairie includes occupied bear habitat and we encourage all visitors to be bear-aware. American Prairie includes active ranching operations; do not approach livestock and leave all fence gates as you find them.

a snowy season, please consider alternate routes: Midale or Regina Road.
